

2.2.1_Policy document and protocol to measure achievements of Advanced and Slow Learners

(2017-18 to 2021-22)

Introduction:

MIMSR Medical College, Latur always endeavours for excellence in student-centric teaching learning activities. In every academic year, there will be some students who can do really well and learn more with better comprehension ability, retention capability and hard working practices. On the other hand, some students may find difficulty in their learning process due to various personal or some other reasons.

In both these situations, the students need special attention and interventions to make their learning activity more enriching and effective.

Advanced Learners:

The term advanced learner in this policy refers to the students who can engage learning activities faster than the other students in the class and achieve high scores and make significant achievements in their life.

They have more potential with their comprehension, retention, memory with Critical thinking, creativity and contextualization practices. They may also have hard working behaviours and usually achieve more than the majority of the classmates. These students are in a great extent gifted and talented than the others in the class. These students can take up higher level of learning and academic responsibilities. They can

bring some new concepts, strategies, and also can take the leadership in the teaching learning activities.

Slow Learners:

The slow learners are poor achievers and lag behind in the academic performance. They may fail in exams or will score only poor grades. They will find it difficult to understand the lessons and may have difficulties in their comprehension, retention, reproduction and integration. They may fail in articulations and critical reflections. Their motivational levels may also be poor and they may find it difficult to adjust with the teaching learning process and can drop out or fail in the programme. The poor performance may not be a sign of the poor capacity or talent but may be due to poor family situations or some other reasons.

Policy Cum Criteria and Methodology of assessment

In every academic year, after announcement of results of First Internal assessment exam, students are categorised into slow learners and advanced learners based on their performance. After identifying slow and advanced learners, special teaching-learning activities are run for them and again the performance of these students is monitored after the declaration of the result of second internal assessment examination, the difference in marks of students is taken into consideration to know the outcome of remedial classes.

Advanced learners are motivated to strive for higher goals. They are provided with additional inputs for better understanding of core concepts by offering special coaching for higher level comprehension.

The slow learners are not labelled as poor achievers or problem students in the class to avoid their demotivation and their disinterest. Instead, they are treated as any other student in the class but they are provided extra coaching and counselling for improvement and achievement.

Every departmental faculty members help the slow learners by giving proper guidance and support to them.

Academic and personal counselling are given to the slow learners by the teacher, mentor and the counselling cell.

The process of giving additional inputs to the advanced learners and the slow learners is not an effort to make the students average achievers but to make every one better achiever. Even if the students are identified as slow learners or advanced learners in the class they are not be labelled as an extra ordinary or poor but they are treated equally in the class with supportive care and appropriate pedagogical systems so that the talented can make more achievement and the less talented also reach the required goal in subject. The mentoring and facilitating efforts of the teachers and the college administrative system is of a great investment in achieving the best result and performance of the students.

Protocol to measure student achievement

- The identified slow learners and advanced learners are given extra coaching.
- Teaching programmes are conducted for both slow and advanced learners.
- At the end of teaching programme, re-examination (theory and practical) is conducted.
- The performance in re-examination is assessed and compared with previous results.
- Outcome analysis is discussed and accordingly, feedback is given to students.

Outcome Statement:

- It has been observed that student/mentees were benefitted with improvement in marks of University Examination,
- With better mental / psychological support, presentation and orientation skill, and overall progression of students in their performance was seen.
- It helped them to proceed towards confidence building and overall personality development.
- In spite of COVID 19 pandemic, all the teacher/mentors provided study material in different forms to slow and advanced learners on social media platforms such as WhatsApp.
